PROFESSIONAL SUMMARY

Fresh Computer Science graduate with hands-on experience in software development, GIS, and AI-assisted data projects through a six-month co-op program. Experienced in geospatial data processing, data validation, chatbot evaluation, and UI prototyping while collaborating in Agile environments. Seeking an entry-level Backend Developer or Software Engineer position.

EXPERIENCE

Data Analyst | First City | Hajj Season 1447 H (2026)

- Analysed pilgrim train dispatch data to support crowd flow operations and reporting

Software Development & GIS Intern | First City | Mar 2025 – Aug 2025

- Cleaned, validated, and maintained large-scale GIS datasets using ArcGIS Pro and QGIS.
- Automated GIS data processing tasks using Python scripts to perform spatial queries, duplicate detection, and attribute validation to improve data quality.
- Participated in the development and evaluation of TsleemGPT, preparing datasets and validating chatbot responses through structured QA testing and prompt evaluation.
- Designed UI prototypes using Figma for internal software projects.
- Collaborated with developers using Git and GitHub in a WSL development environment.

Crowd Management Officer | Al Yamama Company | Hajj Season 1445 H (2024)

- Managed crowd flow at SAR Holy Sites Train stations across high-density zones during Hajj

PROJECTS

AL-Bulbul AL-Balegh (Graduation Project)

- Led a multidisciplinary graduation project from planning to delivery.
- Conducted usability testing, identified functional and UI/UX issues, and validated AI output
- Proposed product improvements based on testing results and UX observations.

Premium Phone Number Automation Tool | Java

- Developed a Java desktop automation tool to identify premium mobile numbers.
- Automated keyboard and mouse interactions to integrate OCR output into the application.
- Processed extracted text and evaluated number patterns based on predefined rules.
- Reduced manual and mental effort through workflow automation.

Notes Web Application | PHP

- Built a simple notes management web application while learning PHP.
- Applied backend fundamentals, including routing, forms, and database operations.

SKILLS

Technical Skills

- Languages:** Java · PHP · SQL · Python · HTML · CSS
- GIS & Spatial:** ArcGIS Pro · QGIS · OpenStreetMap
- Tools:** VS Code · Git · GitHub · WSL · Figma · Stitch
- Concepts:** OOP · Software Design Patterns · QA Testing · SDLC

Core Competencies

- Backend Development
- GIS Data Processing
- Data Validation
- UI/UX Evaluation

EDUCATION

Bachelor's in Computer Science | Umm Al-Qura University | 2022 – 2026

- Graduated: June 2026
- GPA: 3.77 / 4.0

CERTIFICATES

Certificate Title	Issuer	Date
Complete ArcGIS Pro Mastery	Udemy	Mar 2025
Network+ Camp (Boot Camp)	College of Computer Science, UQU	May 2026

LANGUAGES

- Arabic
- English
